" Logging In To Oracle 11g " =====>
====================================

* Click on 'Run SQL Command Line' and use 'connect' command to connect the
database.

* When prompted for user name , type system and for password enter the same
password you selected during the installation process-

SQL> connect
Enter user-name: system
Enter password: oracle
Connected.

"Creating A New User " ===>
=============================

* The command to create a new user is CREATE USER command which has the
following syntax:

Syntax: create user (username) identified by (password);
Example: create user prashant identified by prashant;

username -> prashant
password -> prashant

" Granting Privileges To The User " ====>
==

* For granting these roles we must login to the System user and execute the
following command:

SQL> grant resource, connect to prashant;

" For Show Tables " ====>
==========================

* SQL> description Students
            OR
* SQL> desc Students

 Name   Null?   Type
 -- -------- ---------------------------
-
 STD_ID   NUMBER(3)
 S_NAME   VARCHAR2(30)
 PER   NUMBER(5,2)
 DOB   DATE
 MOBILE_NO   VARCHAR2(10)

" For See Content of the Row " ====>
=====================================

select * from Students;

```
# Comments in SQL ===>   " -- " ==> (Double Dash)
======================

# For See USER name ====>
=========================

# show user;
      OR
# select user from dual;

# ORDERS ===>
=============

* Select ==> From ==> Where ==> Group By ==> Having ==> Order By
```
